SRI KAVYA CHILAMAKURI

LEAD SOFTWARE ENGINEER | REACT | TYPESCRIPT | .NET | MICROFRONTEND ARCHITECTURE

Hyderabad, India | kavya.chilamakuri@gmail.com| +91 9247679240 | LinkedIn |Portfolio

PROFESSIONAL SUMMARY

Lead Software Engineer with **6+ years of experience** building scalable applications using **React, TypeScript, Angular,C#, .NET, and microfrontend architecture**. Experienced in **GPT-4o integration with .NET microservices**, AI-assisted development, API design, and performance optimization. Delivered measurable impact through **50% lower third-party contract spend**, **12% smaller frontend bundles**, **15% higher team velocity**, and healthcare automation saving **5 hours of nursing effort daily**. Skilled in automated testing, CI/CD, technical mentoring, and cross-functional delivery.

TECHNICAL SKILLS

- **Frontend:** React.js, TypeScript, JavaScript, Redux Toolkit, Redux Saga, Redux Thunk, Vue.js, HTML, SCSS/SASS, Material UI, Single-SPA Micro frontends, Angular.
- **Backend & API:** .NET, C#, REST APIs, Microservices, Entity Framework Core, API Design, FHIR APIs, Event-Driven Architecture, Apache Kafka
- **Cloud & DevOps:** Microsoft Azure, Azure Functions, Azure DevOps, Docker, Kubernetes, CI/CD, Webpack,Github Actions,JIRA,ADO
- **Databases & Monitoring:** SQL Server, Cosmos DB, Elasticsearch, Logstash, Kibana (ELK)
- **Testing, Code Quality & AI Tools:** Jest, React Testing Library, Cypress, NUnit, Percy, SonarQube, TDD, Quality Gates, GitHub Copilot, Claude Code, Microsoft Copilot.
- **Architecture & Engineering:** System Design, Frontend Architecture, Performance Optimization, Code Reviews, Technical Mentoring, Secure Access Control, Agile/Scrum, SOLID Principles, Advanced Debugging.

PROFESSIONAL EXPERIENCE

PROVIDENCE INDIA — LEAD SOFTWARE ENGINEER
October 2024 – Present

- Fast-tracked the delivery of an automated Lab Result Management solution using Angular, completing development **1 month ahead of schedule** and streamlining clinical workflows to save approximately **5 hours of nursing effort per working day**.
- Integrated GPT-4o with .NET microservices using asynchronous pipelines to deliver personalized AI-powered dietary recommendations based on patients' Epic EHR records and clinical data.
- Served as a key delivery point of contact for stakeholders and collaborated with the external LabCorp team to align requirements, expectations, and delivery; received stakeholder accolades for the contribution.
- Brought a high-risk Qualtrics implementation in-house, eliminating external delivery dependency and reducing third-party contract spend by approximately 50%.
- Reduced React application bundle size by 12% through code splitting, lazy loading, tree shaking, and dependency optimization, improving initial load performance and frontend delivery efficiency.
- Mentored 5+ engineers and introduced code-review checklists, contributing to a 15% improvement in team velocity.
- Designed secure external-review workflows with controlled guest access and authorization controls.
- Led platform initiatives spanning architecture, stakeholder coordination, and search enhancements, improving content discoverability and user engagement.
- Developed reusable **React and Angular application templates and components**, establishing scalable frontend patterns to improve code reusability, maintainability, and development efficiency across projects.

PROVIDENCE INDIA — SENIOR SOFTWARE ENGINEER
February 2023 – October 2024

- Engineered a custom in-house Find and Replace solution for CKEditor 5, leveraging DOM manipulation to extend native search capabilities and enable advanced text discovery and replacement within rich-text content.
- Increased automated test coverage by 30% through improved testing practices and quality gates.
- Led application-wide theming and UI redesign to improve consistency across the application. Served as a jury member for the 2024 Ideathon.

VALUELABS SOLUTIONS LLP — SENIOR SOFTWARE ENGINEER
August 2022 – February 2023

- Containerized and deployed .NET microservices using Docker and Azure Container Apps, implementing automated CI/CD workflows through Azure DevOps and GitHub Actions to streamline application builds, deployments, and release management.
- Migrated a monolithic React application to a Single-SPA microfrontend architecture and supported deployment through Azure DevOps pipelines.
- Automated scheduled Cosmos DB cleanup, eliminating repetitive manual maintenance and saving approximately 1.5 hours of developer effort per day.
- Introduced SonarQube quality gates to improve code-quality monitoring and maintain a quality score above 85%.

VALUELABS SOLUTIONS LLP — SOFTWARE ENGINEER
August 2020 – July 2022

- Developed SFTP auto-retry mechanisms to address recurring file-transfer failures and reduce manual intervention.
- Architected reusable UI components, standardized React and Vue.js application templates, and developed reusable microservice templates to establish scalable development baselines, accelerate project initialization, reduce development effort, and ensure architectural consistency across multiple in-house initiatives.
- Developed a React-based travel operations platform with shared customer management, automated cost estimation, and trip-lifecycle controls using Redux and Redux Saga.

VALUELABS SOLUTIONS LLP — SOFTWARE INTERN
August 2019 – April 2020

- Contributed to React frontends and .NET microservices, using test-driven development practices.
- Developed automated tests using Cypress and NUnit and supported Hotjar integration. Worked with Kafka-based data pipelines as part of application development.

AWARDS & RECOGNITION

- **Bravo Award —** Providence India, 2026
- **Bravo Award -**Providence India ,2025
- **Runner-Up —** Hack4Health, 2024, for an AI nutrition assistant using GPT-4o
- **Employee of the Quarter —** Value Labs, August 2021
- **Ideathon Jury Member —** 2024

EDUCATION

Bachelor of Technology (B. Tech), Computer Science and Engineering
KL University, Guntur | 2020 - **GPA:** 9.03/10
